

 <b>Journey Steps</b> Which step of the experience are you describing?	 <b>Discovery</b> Why do they even start the journey?	 <b>Registration</b> Why would they trust you?	<b>On-boarding and first use</b> How can they feel successful?	 <b>Sharing</b> What do people typically experience as the process finishes?
<b>Actions</b>  <p>What does the customer do? What information do they look for? What is their context?</p>	 <p>Keep track of Climate changes Detection of Forest fire</p>	 <p>They can continuously monitor the Forest Collect image data and process the images Register the prior records of fire range in the detector</p>	 <p>We can track the accurate location of the forest fire In order to protect humans and wildlife, forest surveillance cameras can be deployed to keep an eye on certain areas.</p>	 <p>Only corporations or the government may use this product to keep an eye on forests. Prohibit the fire from spreading in the geographical area</p>
<b>Needs and Pains</b>  <p>What does the customer want to achieve or avoid? Hint: Reduce ambiguity</p>	 <p>To prevent a forest fire To reduce the devastation caused by forest fires To protect animals from harm To collect the data</p>	 <p>Detection of Fire pattern With the support of this technology, consumers can receive their information earlier and it also alerts the forest fire department in the event of any suspicious activity.</p>	 <p>Corporate/ government/ the forest fire department must routinely monitor the system. Set the sensor range limit to find the disaster</p>	 <p>If they have more connections, they can tell them about their experience. Due to the fact that it is wireless, it is compatible. It can also identify volcanic eruptions.</p>
<b>Touchpoints</b>  <p>What part of the services do they interact with?</p>	 <p>They could interact with the forest fire department.</p>	 <p>System</p>	 <p>Video Demos Speakers</p>	 <p>Social Media Sponsorships</p>
<b>Customer Feelings</b>  <p>What is the customer feeling? Hint: Use the emoji app to express more emotions</p>				
<b>Opportunities</b>  <p>What could we improve or introduce?</p>	 <p>Fire destroys underbrush with limited growth. Gets rid of the trash on the forest floor</p>	 <p>Exposing it to sunshine helps the soil grow.</p>	 <p>Fire frequencies determine the over story of coniferous composition In addition to creating a natural area between the stands</p>	 <p>It contributes to the recycling of nutrients to the large giant trees from the ground layer plants and debris. Therefore the infertile substrates and arrested decomposition are countered.</p>
<b>Process Ownership</b>  <p>Who is the lead?</p>	 <p>Corporation</p>	 <p>Government</p>	 <p>Forest Fire Department</p>	 <p>Government</p>
